

# The Mineral Premix for Poultry

## Benefits

- Supplies a balanced source of minerals and trace-elements specially designed for poultry.
- Includes chelated minerals that provide excellent palatability and high bio-availability.
- Prevents the pathologies caused by an insufficient supplementation of certain minerals and trace-elements.
- Enhances the reproductive ability, growth, and health of poultry.
- Provides stability, homogeneity, allowing free-flowing characteristics, which results in high feed efficiency.
- Includes unique ingredients that improve active immunity systems of poultry, and increases their survival rate.

## Specification

Fe	5.0%	Cu	0.9%
Zn	6.5%	I	0.07%
Mn	8.5%	Se	0.02%
Co	0.019%		

## Recommended Use

The recommended inclusion levels of this product in poultry feeds are from 0.08% to 0.1%.

## Storage

The shelf life will exceed 12 months when unopened packages are stored in a cool, dry place.

## Packing

25 Kg paper bags

We can provide packing based on customers' needs.
